ipd is a team of closely coordinated engineering service companies, offering comprehensive engineering services to industry, manufacturing, and private clients. At ***ipd***, we develop innovative design solutions for complex industrial applications that require specialized engineering expertise. We assemble only those engineering and design disciplines necessary to complete your project in the most cost effective way possible.

We specialize in complex industrial applications that require innovative design solutions.

We apply years of coordinated professional experience to each project, large and small. We will develop concept designs, cost estimates, project specifications, and detailed design drawings. We use modern computer design techniques including Computer Aided Design and Finite Element Analysis to provide accurate and cost effective designs. Additionally, we will provide project management and construction administration services as required to ensure proper implementation of the final design.
